SCHLESWIG-HOLSTEIN-GOTTORP

The line of Gottorp was established in 1533 as a territorial domain for the youngest son of Friedrich I, King of Denmark and Duke of Schleswig-Holstein. Many members of this line and a cadet line founded in 1702 became bishops of Lübeck (see). Duke Karl Peter Ulrich, whose father, Karl Friedrich, had married Anna of Russia, became Czar Peter III in 1762, but was killed shortly after his accession to the throne. His son, Paul, traded Gottorp to Denmark for Oldenburg in 1773 (see Oldenburg) and ruled Russia as Czar Paul I (1798-1901).

RULERS
Johann Adolf, 1590-1616
Friedrich III, 1616-1659
Christian Albrecht, 1659-1694
Land occupied by Danes, 1675-79 and 1683-89
Friedrich IV, 1694-1702
NOTE: For mint officials and arms, see Schleswig-Holstein.

SCHLESWIG-HOLSTEIN-NORBURG

Established upon the division of Schleswig-Holstein-Sonderburg in 1622. The first line became extinct after two generations and passed to Schleswig-Holstein-Plön, from which a second line was begun in 1679. When the Plön branch of the family died out in 1706, Norburg acquired the lands and titles. Schleswig-Holstein-Norburg passed to Denmark in 1761.

SCHLESWIG-HOLSTEIN-SONDERBURG

Sonderburg was split away from Schleswig-Holstein in 1559 and created as a separate duchy for a younger son of King Christian III of Denmark. Divisions of Schleswig-Holstein-Sonderburg occurred in 1622 and again in 1627. The first division resulted in the branches of Glücksburg, Norburg and Plön, all of which were acquired by Denmark in the second half of the 18th century.

SCHWARZBURG

The countship of Schwarzburg had its beginnings in central Thuringia (Thüringen) and the ruling family eventually held numerous small territories from northern to central Thuringia. The earliest rulers known with any historical certainty were counts of Käfernburg in the 12th century. The line was divided into Käfernburg and Schwarzburg in the early 13th century, but when that of Käfernburg became extinct in 1385, most of its territories reverted to Schwarzburg. Several divisions of the countship took place during the next several centuries and at the beginning of the 16th century, there existed the branches of Schwarzburg-Arnstadt, Schwarzburg-Blankenburg and Schwarzburg-Leutenberg. The rulers of the various lines usually struck a joint coinage during the 16th century, but some of the counts issued coins in their own right as well. In 1526, the lines of Schwarzburg-Frankenhausen and Schwarzburg-Sondershausen were established from Schwarzburg-Blankenburg. Frankenhausen only lasted for one generation, but Schwarzburg-Sondershausen was further divided into Schwarzburg-Arnstadt, Schwarzburg-Rudolstadt and Schwarzburg-Sondershausen in 1552 (see separate listings for each of these). The Arnstadt line also failed after a single generation, but was reestablished as a branch of Schwarzburg-Sondershausen in 1642.

SCHWARZBURG-ARNSTADT

The seat of this branch of Schwarzburg is located about 10 miles (16 kilometers) south of Erfurt. The town, castle and surrounding territory were acquired by the counts of Schwarzburg in the early 14th century and a line was soon established separate from Schwarzburg-Blankenburg. The latter fell extinct in the mid-14th century and passed to Arnstadt. Generations later, the lines of Schwarzburg-Sondershausen and Schwarzburg-Rudolstadt were founded and Arnstadt was absorbed by the former, only to reemerge as a separate line in 1642. The last count of Schwarzburg-Arnstadt was raised to the rank of prince in 1709, but died without heirs in 1716.

SCHWARZBURG-RUDOLSTADT

Established upon the division of Schwarzburg-Sondershausen in 1552, the younger main branch of Schwarzburg, centered on the castle and town of Rudolstadt, 17 miles (29 kilometers) south of Weimar, flourished until the end of World War I. The count was raised to the rank of prince in 1711. The three sons of Albrecht VII, the first Count of Schwarzburg-Rudolstadt, ruled and issued coinage jointly, followed by a long succession of sole rulers descended from the middle son, Ludwig Günther I.

RULERS
Albrecht VII, 1552-1605

Joint Rule:
Karl Günther zu Kranichfeld, 1605-1630
Ludwig Günther I zu Rudolstadt, 1605-1646
Albrecht Günther zu Stadtilm, 1605-1634
Albrecht Anton, 1646-1710

SCHWARZBURG-SONDERSHAUSEN

As the elder main line of Schwarzburg established in 1552, the counts of Schwarzburg-Sondershausen controlled their scattered territories from the castle of Sondershausen in northern Thuringia (Thüringen), 10 miles (16 kilometers) southeast of Nordhausen. Count Christian Wilhelm I was raised to the rank of prince in 1697 and the line descended from him until it finally became extinct in 1909. All titles and territories then passed to Schwarzburg-Rudolstadt.

SCHWARZENBERG

The princes of Schwarzenberg based their land holdings in Franconia after Erkinger I of Stefansberg bought the lordship of Schwarzenberg sometime between 1405 and 1411. He became a member of the Imperial Diet in 1429 and upon his death in 1437, his two sons founded the lines of Schwarzenberg-Stefansberg and Schwarzenberg-Hohenlandsberg. The younger line, which was raised to the rank of count in 1566, became extinct in 1646. Its lands and titles reverted to Stefansberg, which attained the countship in 1599. In 1670, the count of Schwarzenberg was made a prince and, a generation later, the territories of Sulz and Kettgau were added to the family holdings through marriage, followed by Krumau in 1719. Having acquired Gimborn earlier, the prince sold that county to Wallmoden in 1783. Klettgau was sold to Baden in 1813, but not before the principality in Franconia was mediatized to Bavaria when the Holy Roman Empire came to an end in 1806. Members of the family retained their titles and held extensive lands in Bavaria, Austria and Bohemia/Czechoslovakia well into the 20th century. Several princes von Schwarzenberg distinguished themselves in both civil and military service to Austria.

SCHWEIDNITZ

The town of Schweidnitz was the seat of a Silesian duchy from about the year 1290. The line of dukes fell extinct in 1392 and the small principality fell to Bohemia until 1526. It passed along with all Bohemian possessions to the Habsburgs until the Prussian conquest and annexation of large parts of Silesia in the 1740s.

The town itself was founded in the 11th century and obtained civic rights in 1250. The town purchased the mint right from the reigning duke in 1351 and began producing a steady stream of coins until the right was taken away by the imperial court. The town revolted at this usurpation of its prerogatives and the mint right was soon restored. Coinage continued, thereafter, until the Kipper Period of the Thirty Years' War.

SCHWEINFURT

Schweinfurt was a Free City located in Lower Franconia some 27 miles northeast of Würzburg. It was first mentioned in 790, became a Free City in the 13th century. Immediately after becoming free, Schweinfurt was the site of a short-lived royal bracteate mint.

The only Schweinfurt local coinage appeared in 1622, though a 1717 series of Reformation commemoratives may have passed as coins.

In 1803 the town was annexed to Bavaria.

SILESIA

The territory of Silesia was historically located between Bohemia and Poland, but was Germanic in character from an early period. The first ruling dynasty, that of the Piasts, was descended from the Polish royal line and soon had divided Silesia into a number of smaller entities. Silesia proper became a part of the Holy Roman Empire in the 14th century and came under the influence of Bohemia, which began striking coins for that territory. After the mid-14th century, Breslau (see) became the capital and the principal mint of the duchy. In 1526, Silesia, along with Bohemia, came into the possession of the Habsburg im perial family. The Austrian-style coinage of Silesia was struck from that time until 1740, with few gaps, most notably during the Thirty Years' War, when the estates struck a series of emergency coinage. All during the period of Habsburg domination, the various semi-independent small duchies, in all their branches, continued to strike their own coins. The bishops of Breslau and a number of towns and cities also issued coinages in their own names (see under Breslau and the town names).

In the 1740's, Prussia conquered the greater portion of Silesia and established a mint in Breslau which struck coins within the Prussian system from 1743 until 1797 (see under Prussia). Silesia remained a province of Prussia throughout the 18th and 19th centuries, only to be divided and partly awarded to Poland after World War I. Following the Second World War, the rest of Silesia was united with Poland and remains as part of that country up to the present day.

SILESIA-LIEGNITZ-BRIEG

One of the major divisions of Silesia and notably having two administrative centers, Silesia-Liegnitz-Brieg went through periods when its two parts were ruled separately by various family members. Liegnitz is northwest of the traditional Silesian capital of Breslau and separated from it by the territory of Neumarkt. Brieg is southwest of Breslau, with the district of Ohlau separating the two entities.

The seemingly numerous divisions of Silesia-Liegnitz-Brieg in reality were not an alienation of the various components of the duchy, but rather a division of the administration by members of the ruling family. Therefore, all parts of Silesia-Liegnitz-Brieg were under a single ruler during some years, whereas the districts of Liegnitz, Brieg, Ohlau, LŸben, Wohlau and Goldberg-Haynau had their own individual dukes during other periods. The rulers sometimes issued joint coinages under this system.

When the last duke died childless in 1675, Silesia-Liegnitz-Brieg passed to the control of the Habsburg emperors as Kings of Bohemia. The duchy finally was acquired by Prussia through force of arms in the 1740's, along with most of the rest of Silesia.

SOEST

Soest is a town in Westphalia, 27 miles (46 km) east of Dortmund. It was important in trade and as an imperial mint from at least the 11th-12th centuries. After Westphalia, for the most part, came under the control of the archbishops of Cologne and Soest grew in its role as a member of the Hanseatic League, the two came into increasing conflict. By the mid-15th century, Soest sought protection from the duke of Cleves. The town produced its own coinage in the late 15th century and then from the second half of the 16th until the mid-18th centuries. Prussia annexed Soest in 1813.

SOLMS-BRAUNFELS

Established in the first division of Solms in 1409, Solms-Braunfels was further divided in 1592 into Solms-Braunfels, Solms-Greiffenstein and Solms-Hungen. Braunfels is located just 1.5 miles (3 km) south of Burgsolms (Hohensolms). Greiffenstein is a small village 7 miles (12 km) northwest of Burgsolms, whereas Hungen is further away, being 12.5 miles (21 km) southeast of Giessen or 22 miles (36 km) east-southeast of Burgsolms. The direct line of Solms-Braunfels became extinct in 1693 and passed to Greiffenstein, which was known as Braunfels from that date onwards count wa.

SOLMS-HERULETZ

(Neuheroletz)

Established as a separate line from Solms-Lich in 1590, it did not acquire a distinctive name until the count, an officer in the service of the emperor, purchased the confiscated Bohemian lordships of Heruletz and Humpolezin in 1623. Marriage brought other Bohemian properties into the count's holdings. It appears that coinage for this distant branch of the dynasty was all struck in the Lich mint. The line only lasted for two generations and reverted to Solms-Lich upon extinction in 1670.

SOLMS-HOHENSOLMS

Centered on the ancestral castle of Hohensolms (the modern Burgsolms), the line was originally known as Solms-Lich and Hohensolms from the division of 1409. A second division into Solms-Lich-Hohensolms and Solms-Laubach was effected before Philipp I's death in 1544. Shortly thereafter, in 1562, Hohensolms and Lich were the objects of separate lines. Hohensolms reacquired Lich in 1718 when the latter fell extinct, revising the name to Solms-Hohensolms-Lich. One count became the Danish king's viceroy in Wolfenbüttel during the Thirty Years' War and a later descendant was raised to the rank of prince in 1792. Solms-Hohensolms-Lick was mediatized during the Napoleonic Era, but counts of this line were still in existence in the 20th century. Most of the early 17th century coins for Solms-Hohensolms were struck at the small village of Nieder-Weisel, just to the southeast of Butzbach, itself about 10 miles (16 km) southeast of Wetzlar.

SOLMS-LAUBACH

Founded by a younger son of Philipp I of Solms-Lich and Hohensolms prior to 1522 and seated at the town of Laubach some 14 miles (23 km) east-southeast of Giessen, this branch lasted until at least the 20th century. The first division in 1561 resulted in the two lines of Solms-Laubach and Solms-Sonnenwalde. The next division occurred when Solms-Laubach, Solms-Baruth, Solms-Sonnenwalde and Solms-Rödelheim were established in 1600. The first Solms-Laubach died out in 1676 and titles passed to Solms-Wildenfels, from which a second line was constituted in 1696. As was the case with all other branches of Solms, Laubach was mediatized around 1806.

SOLMS-LICH

One of the original two divisions of Solms in 1409, with its seat at Lich, just 7 miles (12 km) southeast of Giessen, Solms-Lich was joined with Hohensolms (Burgsolms) until a further division in 1562. The branch of Solms-Heruletz was established from Solms-Lich in 1590, but the parent line fell extinct in 1718. The Lich lands and titles reverted to Solms-Hohensolms in the latter year.

SOLMS-ROEDELHEIM

After a short period of joint rule by the four sons of the count of Solms-Laubach, a division of the patrimony was effected in 1607. The third son established a line in Rödelheim, now a suburb to the immediate west of Frankfurt am Main, acquired at some time before the division. That son died without issue and Solms-Rödelheim passed to Solms-Baruth, from which a new line was founded in 1632/1635. However, the sons of the late count were all minors, so a guardianship was set up, followed by brotherly joint rule until about 1665. Although the counts of Solms-Rödelheim were still flourishing in the early 20th century, their lands were mediatized, along with all other branches of Solms, about the year 1806.

SORAU

The oldest town of Lower Lusatia, Sorau was founded at least by 840 and was the property of the abbey of Fulda until the mid-13th century. It was the seat of the Lords of Döben (Dewin) from 1154 to 1280, then under the Lords of Pack until 1355, at which time it passed to Biberstein. The latter obtained the mint right in 1414. When the Biberstein line died out in 1551, it fell to Brandenburg, which sold it almost immediately to Promnitz. The Lord of Promnitz later struck coins in league with the Elector of Saxony at Sorau during the Kipper Period of the Thirty Years' War.

SPEYER

(Spires)

City and bishopric spanning the Rhine 15 miles south of Mannheim. The bishopric was founded in the 4th century, destroyed by barbarians and re-established in 610. The city received the mint right in 1111 and became the site of the imperial mint. It became a free city of the empire in 1294 and was taken by France from 1801 to 1814. In the latter year, Speyer passed into the possession of Bavaria.

STADE

First mentioned as early as about 1000AD, Stade is located along the Elbe River about 16 miles (27km) west of Hamburg and downstream from that city. Yet, from the mid-11th century, the town was the site for a mint of the archbishops of Bremen. By 1168, Stade was completely under the control of Bremen, but was given the right to strike its own local coinage beginning in 1272. The city struck a series of issues until the late 17th century. Stade was included in the Duchy of Bremen and Werden from 1644 until 1719, then was made a part of Hannover in the latter year.

STENDAL

Albrecht the Bear (1134-1170) founded the provincial town of Stendal, 65 miles (107 km) west of Berlin, in 1151. It became an important mint town for the margraves of Brandenburg by the turn of the 12-13th centuries and struck coins for the increasingly powerful principality through the 16th century. The town gained the right to mint its own coinage in 1488, but only produced a few small silver coins. Again, during the Kipper Period of the early phase of the Thirty Years' War, Stendal had a local copper coinage. The town's arms appear on all its coins: The left half of the Brandenburg eagle and either three ofr four small diamonds, representing stones.

STOLBERG

The castle of Stolberg, located on the southern slopes of the Harz Mountains, 9 miles (15 km) northeast of Nordhausen, is the ancestral home of the counts of that name. The dynasty has a recognized line of succession from count Heinrich I (1210-1239), but the family claimed descent from Otto Colonna, an Italian noble of the 6th century. The column in the family arms signifies this supposed connection, whether historically accurate or not. Count Heinrich was the younger brother of the count of Hohnstein whose castle lay just 6 miles away. Whatever the origin of the earlier counts of Stolberg, they came to an end and the line founded by Heinrich I began in about 1222. The long series of coins, based on the rich Harz silver mine holdings of the family, began at this time. Various territories, some scattered a distance from the family home, were added to the Stolberg lands and two brothers established separate lines in 1538, Stolberg-Stolberg and Stolberg-Wernigerode. Another brother succeeded to the Dietz portion of Königstein in1574.

RULERS
Wolf Ernst in Stolberg, 1552-1606
Johann in Stolberg, 1606-1612
Heinrich XXII, 1552-1615
Ludwig Georg in Ortenberg, 1572-1618
Christof II in Schwarze (Wernigerode), 1572-1638
Wolfgang Georg in Stolberg, 1612-1631
Heinrich Volrad in Ortenberg, 1618-1641

From 1498 to 1638, various combinations of the above counts-brothers, uncles, nephew and cousins-issued extensive coinages jointly in their names. Because the many counts were rulers in their own right in parts of the Stolberg possessions, their jointly issued coinages are treated together under Stolberg. Individual issues are listed under that particular branch of the countship. The joint issue groupings are given designations to avoid repetition of the names in the following manner:
XII - Wolf Ernst, Johann, Heinrich XXII, Ludwig George Christof II, 1587-1606
XIII - Johann, Heinrich XXII, Ludwig Georg, Christof II, 1606
XIV - Johann and Heinrich XXII, 1607-1612
XV - Heinrich XXII and Wolfgang Georg, 1612-1615
XVI - Christof II and Heinrich Volrad, 1618-1638

MINT OFFICIALS' INITIALS
The output of the Harz silver mines belonging to the counts of Stolberg was often beyond the capacity of their several mints to turn into coins. Production of many coins were frequently farmed out to mints in other territories, such as neighboring Mansfeld, or to city mints in Frankfurt am Main, Augsburg, etc. Sometimes mintmasters and die engravers were invited to work in Stolberg mints on a temporary basis. Over the centuries a bewildering number of people worked in and for Stolberg mints and many left their symbols and initials on the coins.

STOLBERG-ORTENBERG

Established in 1572 when Stolberg-Wernigerode was divided by two surviving sons, Ortenberg became a separate branch of the countship. Its seat was at the castle of Ortenberg, 13 miles (22 kilometers) east-northeast of Friedberg in the Wetterau. Stolberg-Ortenberg inherited Königstein in 1581, but sold half of the Königstein-Eppstein territories to Mainz in 1590. The rest followed in 1635 and the line fell extinct in 1641. What remained of its holdings passed to Stolberg-Schwarze (Wernigerode).

STOLBERG-STOLBERG

The old line of counts was divided into the senior (Wernigerode) and junior (Stolberg) branches in1638. The junior branch was divided again in 1704 into Stolberg-Stolberg and Stolberg-Rossla. The two lines issued a large series of coins, mostly as joint issues, throughout the 18th century. There were still counts of Stolberg-Stolberg into the early 20th century.

STOLBERG-WERNIGERODE

The castle of Wernigerode is situated across the Harz Mountains to the north of Stolberg castle, some 12 miles (20 km) west-southwest of Halberstadt. An early division of the old Stolberg line in 1538 resulted in a separate line in Wernigerode. A second division in 1572 established Stolberg-Ortenberg and Stolberg-Schwarza (Wernigerode) and the latter was divided further into 1876 divided further into the senior branch of Stolberg-Wernigerode and the junior branch of Stolberg-Stolberg.Once again, Stolberg-Wernigerode was the foundation of three separate lines at Gedern, Schwarza and Wernigerode in 1710. The first two fell extinct within a century, but Stolberg-Wernigerode lasted into the 20th century.

STRALSUND

The town of Stralsund, founded about the year 1200 on the mainland opposite the island of Rügen in the Baltic Sea, obtained the rights of a Germanic city in 1234. Stralsund later joined the Hanseatic League and remained strong enough to maintain its independence from the dukes of Pomerania, who struck coins in that place during the 13th century. In 1325, the city purchased the right to coin its own money from the duke and began a series which continued until 1763. The city fell under the rule of Sweden from 1637 until 1815, then passed to Prussia along with the rest of Swedish Pomerania.

STRASSBURG

The capital and principal city of Alsace, Strassburg is located very near the Rhine, 55 miles (92 km) southeast of Saarbrucken. It was an early Celtic settlement, then the Roman town of Argentoratum, from which is derived its name as found on many of Strassburg's coins. The first mention of a bishopric existing in the place dates from the 6th century. The city was both home to the bishops and the site of an imperial mint, the latter which functioned from the 9th to the 11th centuries. The bishops had received the right to coin their own money in 873, but it was not until Strassburg was made a free imperial city in the early 13th century that the townspeople came into conflict with them. When bishop Walter von Hohengeroldseck (1260-1263) tried to reassert authority over the town, the populace rose up and soundly defeated him at the Battle of Oberhausbergen in 1262. The power of the bishopric never recovered, then the city grew in importance and Strassburg city received the mint right in 1334, even though coins were struck in its name locally beginning in 1296.Strassburg's coinage continued until beyond the annexation of the city in 1681, whereas issues by the bishops continued until 1773. The bishopric was finally secularized and annexed by France in 1789.

ARMS
Strassburg - diagonal bar from upper left to lower right, often a fleur-de-lis appears on city coinage as well.
Alsace - similar diagonal bar with 6 crowns, 3 on each side along bar.
Lorraine - similar diagonal bar with 3 small eagles within it.

SULZ

The counts of this Swabian territory became landgraves of Klettgau in Baden around 1425. They apparently struck no coins until the 17th century when Alwig VII and his brother Karl Ludwig had a small coinage. Maria Anna, daughter and heiress of the last of the line, Johann Ludwig (1648-87), married Ferdinand Wilhelm of Schwarzenberg and the lands passed to that house.

RULERS

Karl Ludwig I, 1572-1617
Rudolf VII, 1572-1617
Alwig VII, 1617-1632
Karl Ludwig II Ernst, 1617-1648
Ulrich, 1648-50
Johann Ludwig, 1648-87
Maria Anna, 1687-96

MINT OFFICIALS' INITIALS

Initial	Date	Name
PM	1612-21	possibly Johann Philipp May in Zweibrücken
MS	1622-55	Matthäus Schaffer der Jüngere, die-cutter in Nuremberg
	Ca. 1675	Johann Georg Gilly (Gyllin), mintmaster in Tiengen

The mint for Sulz usually operated at Tiengen.

ARMS

Old Sulz - 3 points (or pointed mountains)
Klettgau – 3 sheaves
Brandis – knotty pine limb, sometimes with flame at one end
Abbey of Rheinau – curved fish

TESCHEN

The Duchy of Teschen constituted part of Upper Silesia, the southern region of Silesia proper. The ruling family of medieval Silesia, as vassal s of the kings of Bohemia, underwent several divisions. The branch from which the dukes of Teschen descended was established in 1288. The last duke died in 1625 and was succeeded for a time by his sister before Teschen passed to Bohemia and thus, into the hands of the Habsburgs.

TEUTONIC ORDER

(Deutscher Orden)

The Order of Knights was founded during the Third Crusade in 1198. They acquired considerable territory by conquest from the heathen Prussians in the late 13th and early 14th centuries. The seat of the Grand Master moved from Acre to Venice and in 1309 to Marienburg, Prussia. The Teutonic Order began striking coins in the late 13th century. In 1355 permission was granted to strike hellers at Mergentheim. However, the bulk of the Order's coinage until 1525 was schillings and half schoters minted in and for Prussia. In 1809 the Order was suppressed and Mergentheim was annexed to Württemberg.

RULERS
Maximilian of Austria, 1588-1618
Karl of Austria, 1618-1624
Johann Eustach von Westernach, 1625-1627
Johann Caspar von Stadion, 1627-1641
Leopold Wilhelm of Austria, 1641-1662
Karl Josef of Austria, 1662-1664
Johann Caspar II von Ampringen, 1664-1684
Ludwig Anton von Pfalz-Neuburg, 1684-1694
Ludwig Franz von Pfalz-Neuburg, 1694-1732

ARMS

THANN

Located just 8 miles (14km) west-northwest of Mühlhausen in Alsace, the town of Thann was raised to the rank of free imperial city in 1383. Bracteats were minted there in the 13th century and it had a proper city coinage during the late 15th to 17th centuries. At the conclusion of the Thirty Years' War in 1648, France acquired the town in the general peace settlement.

TRIER

The city of Trier, located on the Mosel River just a few miles from the border with Luxembourg, was an important place from Roman times up to the modern era. Tradition holds that the Emperor Claudius founded the city as Augusta Trevirorum (imperial city of the Treviri, a Belgian tribe of that locale). Even today, Trier contains more Roman antiquities than any other city in northern Europe and was one of the earliest centers of Christianity north of the Alps. Some parts of the 4th century basilica built by Valentinian I (364-75) are extant in the present cathedral, which dates from the 11th to 13th centuries. Trier was the western capital of the Roman Empire until it was taken by the Franks in 464. A bishopric was established there at the dawn of the Middle Ages and was raised to an archbishopric under Bishop Hetto (814-47). The earliest archiepiscopal coinage dates from the end of the 10th century. The importance of Trier grew during the High Middle Ages as the city became one of the ecclesiastic electorates of the German Empire under Baldwin of Luxembourg (1307-54). That lofty status was confirmed by the Golden Bull of 1356, which permanently established the seven electorates of the Empire. The wealth, power and prestige of the archbishops continued through the Late Middle Ages and withstood the Protestant Reformation in the 16th century. The economy of Trier was severely circumscribed by the hyper-inflation of the early period of the Thirty Years' War, and the city never regained its former position. Trier was taken by the French in 1794 and the last archbishop fled from his domains. In 1802, the archbishopric was secularized and divided between Nassau and France, but Prussia obtained most of Trier's territory in 1815, following the conclusion of the Napoleonic Wars.

ULM

A free city on the Danube located about 60 miles southeast of Stuttgart, Ulm is known from documents to have existed at least from the mid-9th century. During the 11th century, Ulm rose to prominence as the chief urban center of Swabia. The city was granted the distinction of a free imperial city in 1155. The right to mint its own coinage was given to the city in 1398. After a period of jointly issued coins with the cities of Ravensburg and Überlingen, Ulm struck a long series on its own beginning in 1546. Local city coinage ended in 1773, but it was not until 1803 that its free status ended, at which time Ulm became part of Bavaria. Ulm passed permanently to Württemberg in 1809.

VERDEN

The bishopric of Verden was established by Charlemagne in 785 on the Aller River, 22 miles (36 km) southeast of Bremen. Emperor Otto III (983-1002) gave the mint right to Bishop Erpo (976-993) in 985, but the first identifiable Episcopal coinage did not appear until the first half of the 14th century. The bishopric underwent the Reformation and became a Protestant see in the mid-16th century. As part of the settlement folllowing the Thiry Years' War, Verden was awarded to Sweden and, having been joined to Bremen in 1644, became part of a secular duchy in 1648 (see Bremen & Verden). The bishops struck a few intermittent issues and the cathedral chapter supplemented those during the early part of the the 17th century.

WALDECK

The former Countship of Waldeck was located in the western part of the German Empire, bordered by the Landgraviate of Hesse-Cassel on the east and south, the Duchy of Westphalia on the west and the Bishopric of Paderborn on the north. Arolsen was the seat of the counts and they traced their line of descent from a branch of the counts of Schwalenberg beginning in the early 11th century. Waldeck underwent several divisions over the centuries, the first such significant occurrence having taken place in 1474 with the establishment of Waldeck-Wildungen and Waldeck-Eisenberg. The latter was further divided into Waldeck-Eisenberg and Waldeck-Neu-Landau in 1539, but the former inherited Wildungen when the elder branch of the family became extinct in 1598. The line at Neu-Landau failed after two generations and reverted to Eisenberg the previous year (1597). A new line at Wildungen was established from Eisenberg in 1598 as well, but this, too, fell extinct in 1692, only ten years after the count having been raised to the rank of prince.

Waldeck-Eisenberg had received the Countship of Pyrmont in 1625 and became known as Waldeck-Pyrmont (see) upon the permanent unification of the two countships in 1668.

WALDECK-PYRMONT

The Count of Waldeck-Eisenberg inherited the Countship of Pyrmont, located between Lippe and Hannover, in 1625, thus creating an entity which encompassed about 672 square miles (1120 square kilometers). Waldeck and Pyrmont were permanently united in 1668, thus continuing the Eisenberg line as Waldeck-Pyrmont from that date. The count was raised to the rank of prince in 1712 and the unification of the two territories was confirmed in 1812. Waldeck-Pyrmont joined the German Confederation in 1815 and the North German Confederation in 1867. The prince renounced his sovereignty on 1 October of that year and Waldeck-Pyrmont was incorporated into Prussia. However, coinage was struck into the early 20th century for Waldeck-Pyrmont as a member of the German Empire. The hereditary territorial titles were lost along with the war in 1918. Some coins were struck for issue in Pyrmont only in the 18th through 20th centuries and those are listed separately under that name.

WARBURG

A town in Westphalia 23 miles (38 km) southeast of Paderborn. Control of the town was transferred by Count Dedico von Wartberch to the Bishopric of Paderborn in 1020. Warburg remained under the administration of the bishops, having been the site of an episcopal mint in the 13th century, until secularization in 1803, when it passed to Prussia. It was included in the Kingdom of Westphalia from 1807 to 1813, but was returned to Prussia in the latter year. Warburg was garrisoned by various armies during the Thirty Years' War, which occasioned a short-lived issue of copper coins authorized by the bishop, Ferdinand of Bavaria (1618-50).

WEISSENBURG

(Wissembourg)

A town in the Lower Alsace, 42 miles northeast of Strassburg. It grew up around a Benedictine Abbey founded in the 7th century. It became a free imperial city in 1305, but had a very limited coinage. It went with the rest of Alsace to France in 1648 and shared the subsequent adventures of that province.

WERDEN & HELMSTEDT

Bishop Ludger of Münster (791-809) founded the monasteries of Werden and Helmstedt early in his tenure as bishop. Werden is located on the River Ruhr six miles (10 kilometers) south of Essen, whereas Helmstedt is situated 20 miles (34 kilometers) east of Braunschweig in Niedersachsen. The abbot obtained the right to mint coins at Werden and at Lüdinghausen from Emperor Otto II (973-83) in 974, but the earliest known coins of the two monasteries date from the 11th century. A small, but fairly steady stream of issues were produced from the 16th century through the middle of the 18th century. In 1803, Werden and Helmstedt were secularized and their fifty square miles of territory were annexed to Prussia.

RULERS

Heinrich III Duden, 1573-1601
Conrad II Kloet, 1601-1614
Hugo Preutäus von Assindia, 1614-1646
Heinrich IV Dücker, 1646-1667
Adolf IV von Borken, 1667-1670
Ferdinand von Erwitte, 1670-1706

Arms: (early type) – two crossed crosiers.
(later type) – two crossed crosiers in small shield superimposed on cross in larger shield
Imperial eagle - sometimes included to signify that the abbeys had imperial support and sanction.

WESTPHALIA

(Westfalen)

The Duchy of Westphalia was very early the western part of the old Duchy of Saxony. In 1180, most of Westphalia fell to the archbishops of Cologne who added "Duke of Westphalia" to their titles. When Cologne was secularized in 1801, the duchy was administered by Hesse-Darmstadt until 1814 when it was annexed by Prussia. Coins were struck by the archbishops at the beginning of the 17th century and during the early years of the Thirty Years' War specifically for use in the duchy. For the names of the dukes and archbishops, see Cologne.

WIEDENBRUCK

The parish church of St. Aegidius in Wiedenbrück was home to a seminary from 1259 until 1810. It was closely tied to the bishopric of Osnabrück (which see). However, the town is located on the upper Ems River, next to Rheda and about 55 miles (90 kilometers) south-southeast of Osnabrück. At various times, Wiedenbrück served as a mint site for the bishops, but it also issued a series of coins for local use from 1596 to 1716.

WISMAR

A seaport on the Baltic, the city of Wismar is said to have obtained municipal rights from Mecklenburg in 1229. It was an important member of the Hanseatic League in the 13th and 14th centuries. Their coinage began at the end of the 13th century and terminated in 1854. They belonged to Sweden from 1648 to 1803. A special plate money was struck by the Swedes in 1715 when the town was under siege. In 1803, Sweden sold Wismar to Mecklenburg-Schwerin. The transaction was confirmed in 1815.

ARMS
2-fold arms divided vertically, half of bull's head of Mecklenburg on left, four alternating light and dark horizontal bars on right. In coin designs, the darker bars are usually designated by cross-hatching or other filler. Some designs show only the four-bar arms in a shield and these are designated "single Wismar arms."

WOLGAST

A port city situated at the Baltic coast and the mouth of the Peene River. They received their civic rights in 1247. During the 14th century the dukes of Pomerania struck debased denars at Wolgast. In the late 16th century the city had its own local coinage. When the last duke died in1625, Pomerania became united under Bogislaus XIV, who died in 1637. Coins were probably struck in his name in Wolgast as well as in Stettin.

The Swedes occupied Pomerania during the Thirty-Years War, and Bogislaus was obliged to become an ally. From 1630, Wolgast was a part of Swedish Pomerania until it was ceded to Prussia in 1815. Coins were struck for the Swedish authorities only in 1633, in memory of King Gustavus II Adolphus.

WORMS

A bishopric was founded at this town site on the rhine in the 4th century and then destroyed by the Hun invasion during the 5th century. The second founding of the ecclesiastic seat occurred in the early 7th century and a long line of bishops ensued. By the Napoleonic era, the bishopric of Worms had been reduced to two enclaves outside of and south of the city, on either bank of the Rhine. The part on the west bank was annexed by France in 1801, while Hesse-Darmstadt obtained the secularized portion east of the Rhine in 1803. The part originally taken by France went to Hesse-Darmstadt in 1815.

FREE IMPERIAL CITY

The site of present-day Worms, located on the Rhine River 25 miles south of Mainz, was occupied before the Roman advance into Germany. An imperial mint was established in the town in the late 9th century and operated through the end of the 11th century. Worms was created a free imperial city in 1156 and obtained the mint right, separate from the bishopric, in 1234. However, most of the city's coinage was produced during the 17th century, with a few commemoratives having been struck also in the early18th century. French forces burned the city to the ground in 1689 and Worms was very slow to recover. It was annexed to France in 1801, but passed along with the episcopal lands to Hesse-Darmstadt in 1815.

WÜRTTEMBERG

Located in South Germany, between Baden and Bavaria, Württemberg obtained the mint right in 1374. In 1495 the rulers became dukes. In 1802 the duke exchanged some of his land on the Rhine with France for territories nearer his capital city. Napoleon elevated the duke to the status of elector in 1803 and made him a king in 1806. The kingdom joined the German Empire in 1871 and endured until the king abdicated in 1918.

WÜRTTEMBERG-OELS

In 1647, Sylvius Nimrod, the elder son of Duke Julius Friedrich of Württemberg-Weiltingen, married Elisabeth Maria, the only child of the last duke of Münsterberg-Öls in Silesia, Karl Friedrich. The duchy of Öls thus passed to the control of a cadet line of the dukes of Württemberg until nearly the end of the 18th century.

The three surviving sons of Sylvius Nimrod lived under the regency of their mother until 1672, as he had died while they were still young, but then they divided their territory and titles. They established the branches of Württemberg-Öls, Württemberg-Öls-Bernstadt and Württemberg-Öls-Juliusburg. The elder line of Württemberg-Öls became extinct after only one generation and the two younger brothers divided those lands as well. When Bernstadt and Juliusburg died out in 1742 and 1745 respectively, all the Öls territories were reconstituted in the remaining member of the family, Karl Christian Erdmann, nephew of the last Bernstadt duke. He died childless in 1792 and Öls passed to Brunswick-Wolfenbüttel by virtue of his marriage to Friederike, daughter of Friedrich August of that duchy.

WÜRTTEMBERG-WEILTINGEN

Established from the main line of Württemberg dukes in 1608, this branch of the family ruled for about a century. Centered on Weiltingen, about 13 miles (21 km) north-northwest of Nördlingen on the Wörnitz River, the line fell extinct after three generations. The elder son of the first duke married well, however, and inherited the duchy of Öls in Silesia (see Württemberg-Öls). The Weiltingen holdings reverted to Öls upon the death of the last duke in 1705.

WÜRZBURG

Würzburg is situated on the River Main some 60 miles (100 km) east-southeast of Frankfurt am Main, having been founded during the seventh century. St. Boniface established a bishopric there in 741 and installed the first bishop, St. Burchard. His successors received the right to mint coins in the 11th century. The earliest coins were issued under Bruno von Kärnten (1034-45) and featured a monogram based on his name. This devise usually took the form of a cross with letters attached to the arms. This basic type lasted until the 15th century and was occasionally resurredted after that time. In 1441, the bishop as also invested as the Duke of East Franconia and that title was incorporated into the inscriptions of the episcopal coinage. The bishopric of Würzburg was secularized in 1803 and annexed by Bavaria. Except for the period 1806-14, when it was made into a grand duchy for Archduke Ferdinand of Salzburg and Tuscany, Würzburg remained a part of Bavaria.

The United Kingdom of Great Britain and Northern Ireland, located off the northwest coast of the European continent, has an area of 94,227 sq. mi. (244,820 sq. km.) and a population of 54 million. Capital: London. The economy is based on industrial activity and trading. Machinery, motor vehicles, chemicals, and textile yarns and fabrics are exported.

After the departure of the Romans, who brought Britain into a more active relationship with Europe, it fell prey to invaders from Scandinavia and the Low Countries who drove the original Britons into Scotland and Wales, and established a profusion of kingdoms that finally united in the 11th century under the Danish King Canute. Norman rule, following the conquest of 1066, stimulated the development of those institutions, which have since distinguished British life. Henry VIII (1509-47) turned Britain from continental adventuring and faced it to the sea - a decision that made Britain a world power during the reign of Elizabeth I (1558-1603). Strengthened by the Industrial Revolution and the defeat of Napoleon, 19th century Britain turned to the remote parts of the world and established a colonial empire of such extent and prosperity that the world has never seen its like. World Wars I and II sealed the fate of the Empire and relegated Britain to a lesser role in world affairs by draining her resources and inaugurating a worldwide movement toward national self-determination in her former colonies.

The Republic of Guatemala, the northernmost of the five Central American republics, has an area of 42,042 sq. mi. (108,890 sq. km.) and a population of 10.7 million. Capital: Guatemala City. The economy of Guatemala is heavily dependent on agriculture, however, the country is rich in nickel resources which are being developed. Coffee, cotton and bananas are exported.

Guatemala, once the site of an ancient Mayan civilization, was conquered by Pedro de Alvarado, the resourceful lieutenant of Cortes who undertook the conquest from Mexico. Cruel but strategically skillful, he progressed rapidly along the Pacific coastal lowlands to the highland plain of Quetzaltenango where the decisive battle for Guatemala was fought. After routing the Indian forces, he established the city of Guatemala in 1524. The Spanish Captaincy-General of Guatemala included all Central America but Panama. Guatemala declared its independence of Spain in 1821 and was absorbed into the Mexican empire of Augustin Iturbide (1822-23). From1823 to 1839 Guatemala was a constituent state of the Central American Republic. Upon dissolution of that confederation, Guatemala proclaimed itself an independent republic. Like El Salvador, Guatemala suffered from internal strife between right-wing, US-backed military government and leftist indigenous peoples from ca. 1954 to ca. 1997.

Hungary is located in central Europe.

The ancient kingdom of Hungary, founded by the Magyars in the 9th century, achieved its greatest extension in the mid-14th century when its dominions touched the Baltic, Black and Mediterranean Seas. After suffering repeated Turkish invasions, Hungary accepted Habsburg rule to escape Turkish occupation, regaining independence in 1867 with the Emperor of Austria as king of a dual Austro-Hungarian monarchy.

The Lodi Sultanate of Delhi was conquered by Zahir-ud-din Muhammad Babur, a Chagatai Turk descended from Tamerlane, in 1525AD. His son, Nasir-ud-din Muham-mad Humayun, lost the new empire in a series of battles with the Bihari Afghan Sher Shah, who founded the short-lived Suri dynasty. Humayun, with the assistance of the Emperor of Persia, recovered his kingdom from Sher Shah's successors in 1555AD. He did not long enjoy the fruits of victory for his fatal fall down his library steps brought his teenage son Jalal-ud-din Muhammad Akbar to the throne in the following year. During Akbar's long reign of a half century, the Mughal Empire was firmly established throughout much of North India. Under Akbar's son and grandson, the emperors Nur-ud-din Muhammad Jahangir and Shihab-ud-din Muhammad Shah Jahan, the state reached its apogee and art, culture and commerce flourished.

One of the major achievements of the Mughal government was the establishment of a universal silver currency, based on the rupee, a coin of 11.6 grams and as close to pure silver content as the metallurgy of the time was capable of attaining. Supplementary coins were the copper dam and gold mohur. The values of these coin denominations were nominally fixed at 40 dams to 1 rupee, and 8 rupees to 1 mohur; however, market forces determined actual exchange rates.

The maximum expansion of the geographical area under direct Mughal rule was achieved during the reign of Aurangzeb Alamgir. By his death in 1707AD, the whole peninsula, with minor exceptions, the whole subcontinent of India owed fealty to the Mughal emperor.

Aurangzeb's wars, lasting decades, upset the stability and prosperity of the kingdom. The internal dissension and rebellion which resulted brought the eclipse of the empire in succeeding reigns. The Mughal monetary system, especially the silver rupee, supplanted most local currencies throughout India. The number of Mughal mints rose sharply and direct central control declined, so that by the time of the emperor Shah Alam II, many nominally Mughal mints served independent states. The common element in all these coinage issues was the presence of the Mughal emperor's name and titles on the obverse. In the following listings no attempt has been made to solve the problem of separating Mughal from Princely State coins by historical criteria: all Mughal-style coins are considered products of the Mughal empire until the death of Muhammad Shah in 1784AD; thereafter all coins are considered Princely State issues unless there is evidence of the mint being under ever-diminishing Imperial control.

COPPER COINAGE

Persian Word Dates

The copper coins of Akbar issued from AH963 until 1014 were often dated with written Persian words rather than (or in addition to) Arabic numerals. These dates are obviously bulky and crowd one whole face of the flan often with much of the date cut. The pattern of the worded dates follows; with patience the date can be reconstructed even if numerals are missing. The legends read right to left, bottom to top.

Examples:

Two	دو
Seventy and	هفتاد و
Nine hundred and	نهصد و
Year	سنه
AH972	۹۷۲
Ninety	نود
Nine hundred and	نهصد و
Year	سنه
AH990	۹۹۰

Persian Numbers:

یك or یک one	شصت sixty
دو two	هفتاد seventy
سه or ســـ three	هشتاد eighty
چهار or چهار four	نود ninety
پنج five	نهصد نهصد nine hundred
شش six	یك هزار one thousand
هفت seven	
هشت four	سنه or ســـ year
نه or نـــ nine	و and

Silver Coinage

The standard for the Mughal rupee was 11.444 g of .984 Silver with an actual silver weight (ASW) of .362 ounce.

Type 88

In the second half of Akbar's reign the pattern of the silver coinage was changed drastically. The Kalima, the Muslim profession of faith, was dropped from the obverse and the expression *Allahu Akbar Jalla Jalalahu*. "God is great, bright is His glory" (thought to have been meant as a punning reference to the emperor's name) was substituted. Akbar's name and titles were deleted from the reverse, and the mintname with Ilahi year and Persian month placed in center flan.

Type 97

During the last decade of Akbar's reign, his son Salim grew increasingly restive in the desire to assume supreme power. He rebelled outright several times, and, as governor of Allahabad Province, refused to recognize Akbar's suzereignty. The silver coins struck at Allahabad of this period were issued anonymously without following the imperial style, but with a Persian poetic couplet giving mintname and date.

Rebellion Coinage

Akbar's was a conquest state, the major provinces of which were independent kingdoms before incorporation in the Empire. On several occasions coinage was issued by displaced local kings during attempts to re-conquer their kingdoms from Akbar. These issues, coming after the initiation of Mughal-style coinage in their provinces,are listed here.

Gold Coinage

First general issue in gold, the mohur with Hejira dating. All mohurs during Akbar's first thirty years (and some thereafter) carried the Kalima on the obverse and his name and titles on the reverse. They maintained the same weight standard, around 11 grams. Planchets were regularly round except for the rare lozenge-shaped "mehrabi" and some square types after AH987. There was much variety in borders and ornamentation, and some in royal titulature. Representative varieties of various mints are illustrated below.

Heavy "Mohur" Gold Coinage

Between AH986 and 988 gold mohurs were struck at some of the main Mughal mints on square planchets and on a "heavy" weight standard of about 12 grams. This was repeated in the millennial year AH1000 at the travelling camp mint Urdu Zafar Qarin with the striking of heavy mohurs and fractions. A few heavy mohurs on round planchets and with special designs were also struck in the Ilahi dating system, as illustrated.

INDIA, MUGHAL EMPIRE

Jahangir, Nur-ud-din Muhammad,

نورالدین محمد جہانگیر

Copper Coinage

The copper coinage of Jahangir is scarce in comparison with the profuse issues of Akbar. No comprehensive type listing is possible given the few specimens available for study.

Silver Coinage

Type 149

Obv. and rev. form a poetic couplet. Each mint has a distinctive couplet. A typical word from the central portion of the rev. legend is given as identifier for each sub-type in this section.

Type 158

Obv. and rev. form a poetic couplet. Each mint has a distinctive couplet. A typical word from the rev. legend is given as identifier for each sub-type in this section.

Nisar

The nisar was a specially struck coin for ceremonial largesse. Unusual denominations struck by Jahangir were the Nur Afshan or "light scattering," and the Khair-i-qabul or "acceptable."

Gold Coinage

Type 176

The standard issue mohurs of Jahangir show much variation in execution. Illustrated is a Burhanpur mohur, typical of the average size and design. For comparison sake, two of the very handsomely executed mohurs of Agra are also shown. The design of the Agra mohur tended to be altered frequently, with much variation in border design and calligraphy.

Type 186

Poetic couplets based on Ilahi month names. From the year 1019, at a few mints, a specially composed poetic couplet was employed on the coin for each month. The decorative borders and calligraphy varied monthly. Only a sample illustration is included.

5 Mohurs

Jahangir's treasury stockpiled gold and silver in the form of stamped ingots which were in effect giant coins. 5, 10, 20, 50, 100 and higher mohur denominations are recorded by contemporary observers. In some instances these multiple mohurs were presented to ambassadors, and probably others, and so not all passed away with the Mughal treasury in later reigns. We have illustrated just one such coin.

Like the copper coinage of his predecessor Jahangir, Shah Jahan's copper has not survived in sufficient quantities to permit a comprehensive typology. What is listed is a tentative listing.

Silver Coinage

Nazarana

Certain of the previous coin-types of Shah Jahan were specially struck on wide planchets to produce "nazarana" or presentation coins. These are recognizable by the full die impression appearing on wider-than-normal flans.

Legal Dirham

The "legal dirham" was an exotic coin struck in order to satisfy the strictest interpretations of the Quran in regard to dowry, capitation tax and charity giving. The weight of the coin, at 2.97 g, was intended to equal the dirham of the early Caliphs. The coins are rare, and probably not more than a token number were struck to satisfy the emperor's whim.

MINT EPITHETS

Mughal mintnames were often accompanied by honorific epithets. Quite often the epithet is visible on the flan when the mintname is absent or cut; in such cases the epithet is the best identification for the coin's mint of issue.

DATING

The Mughal coins were dated both in the Hejira era and in the regnal era of each emperor. The four-digit Hejira year usually was shown on the obverse, with the one or two-digit regnal (jalus) year on the reverse. Since the regnal and calendar years did not coincide, it was common for two different regnal years to appear on the coins produced during any calendar year. The first jalus year of each reign was usually written as a word, *ahd,* rather than as a numeral.

An exception to the foregoing is that the date on certain coins struck in the Islamic millenial year AH1000 is sometimes represented by the Arabic word *Alf,* meaning "one thousand." This device was especially used by the Urdu Zafar Qarin Mint.

THE ILAHI ERA

In his 29th regnal year Akbar determined to use a regnal era based on solar years in his administration, instead of the Hejira or Era of the Hegira based on lunar years. The new dating system appeared on the coins the same year, and continued until Akbar's death in Year 50. Mints gradually changed their usage from AH to Ilahi, although some did not convert. During the Ilahi period, many of the mints included the Persian month names as well as year of issue. Use of Ilahi dates continued into the reign of Shah Jahan.

Synchronization of Ilahi, Hejira and AD Eras:

Ilahi	Hejira	AD
Ilahi 30	AH993/4	1585/6
Ilahi 31	AH994/5	1586/7
Ilahi 32	AH995/6	1587/8

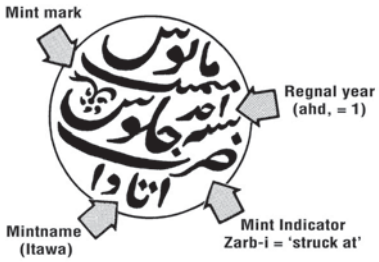
STANDARD COIN PATTERN

The Mughal Rupees and Mohurs from the time of Aurangzeb (d.1707AD), generally followed a standard pattern of layout.



Obverse:

Date (1174) **Emperor's name (Shah Alam)**

Legend, (read right to left, bottom to top) 'Auspicious coin of the fighter of infidels, the emperor of Shah Alam'.

Reverse:

Legend, (read right to left, bottom to top) 'Struck in Itawa in the Year One of the accession associated with prosperity'.

There are many variations of this layout, especially as to the poetic couplet containing the ruler's name on the obverse. In general however the provincial mints and independent state mints used the simple standard pattern.

Largesse Coinage

نسار

Nisar

The nisar, literally scattering coins, were lightweight silver and gold coins minted especially as largesse money to be scattered amongst the crowd during festival processions and such-like state occasions. The coins were struck to 1/32 rupee, 1/16 rupee, 1/8 rupee, 1/4 rupee and 1/2 rupee weights. To better economize, they were very thin with wide flans, appearing more generous than was the case. All coins bore the name nisar, and the different weights should not be considered separate denominations, since this was ceremonial and not circulating currency. The 1/4 rupee weight is encountered more frequently while specimens struck in the other weights remain quite rare.

TABLE OF PERSO-ARABIC WORDS

Obverse and reverse form a poetic couplet. Each mint has a distinctive couplet. A typical word from the central portion of the reverse legend is given as identifier for each sub-type in this section. These are found on the 1 Rupee, KM#149 series.

AHMADNAGAR

Nizam Shahs

The Nizam Shahi dynasty owed its origin as an independent kingdom to Malik Ahmad, the Bahmani governor of Junnar. In 1490, Malik Ahmad revolted against his superiors by defeating Mahmud Bahmani's army. He then assumed the name of Ahmad Nizam Shah, from which name the dynasty itself became known.About 1574 Ahmadnagar annexed Berar and the short-lived Imad Shahi dynasty came to an end. Ahmadnagar came under increasing Mughal pressure after 1596 and was annexed by Shah Jahan in 1637.

ASSAM

It was in the 13th century that a tribal leader called Sukapha, with about 9,000 followers, left their traditional home in the Shan States of Northern Burma, and carved out the Ahom Kingdom in upper Assam.

The Ahom Kingdom gradually increased in power and extent over the following centuries, particularly during the reign of King Suhungmung (1497-1539). This king also took on a Hindu title, Svarga Narayan, which shows the increasing influence of the Brahmins over the court. Although several of the other Hindu states in north-east India started a silver coinage during the 16th century, it was not until the mid-17th century that the Ahoms first struck coin.

From the time of Kusain Shah's invasion of Cooch Behar in 1494AD the Muslims had cast acquisitive eyes towards the valley of the Brahmaputra, but the Ahoms managed to preserve their independence. In 1661 Aurangzeb's governor in Bengal, Mir Jumla, made a determined effort to bring Assam under Mughal rule. Cooch Behar was annexed without difficulty, and in March 1662 Mir Jumla occupied Gargaon, the Ahom capital, without opposition. However, during the rainy season the Muslim forces suffered severely from disease, lack of food and from the occasional attacks from the Ahom forces, who had tactically withdrawn from the capital together with the king. After the end of the monsoon a supply line was opened with Bengal again, but morale in the Muslim army was low, so Mir Jumla was forced to agree to peace terms somewhat less onerous than the Mughals liked to impose on subjugated states. The Ahoms agreed to pay tribute, but the Ahom kingdom remained entirely independent of Mughal control, and never again did a Muslim army venture into upper Assam.

RULERS

Ruler's names, where present on the coins, usually appear on the obverse (dated) side, starting either at the end of the first line, after *Shri*, or in the second line. Most of the Ahom rulers after the adoption of Hinduism in about 1500AD had both an Ahom and a Hindu name.

COINAGE

It is frequently stated that coins were first struck in Assam during the reign of King Suklenmung (1539-1552), but this is merely due to a misreading of the Ahom legend on the coins of King Supungmung (1663-70). The earliest Ahom coins known, therefore, were struck during the reign of King Jayadhvaja Simha (1648-1663). Although the inscription and general design of these first coins of the Ahom Kingdom were copied from the coins of Cooch Behar, the octagonal shape was entirely Ahom, and according to tradition was chosen because of the belief that the Ahom country was eight sided. Apart from the unique shape, the coins were of similar fabric and weight standard to the Moghul rupee.

The earliest coins had inscriptions in Sanskrit using the Bengali script, but the retreat of the Moghul army under Mir Jumla in 1663 seems to have led to a revival of Ahom nationalism that may account for the fact that most of the coins struck between 1663 and 1696 had inscriptions in the old Ahom script, with invocations to Ahom deities.

Up to this time all the coins, following normal practice in Northeast India, were merely dated to the coronation year of the ruler, but Rudra Simha (1696-1714) insti-tuted the practice of dating coins to the year of issue. This ruler was a fervent Hindu, and reinstated Sanskrit inscriptions on the coins. After this the Ahom script was used on a few rare ceremonial issues.

The majority of coins issued were of silver, with binary subdivions down to a fraction of 1/32nd rupee. Cowrie shells were used for small change. Gold coins were struck throughout the period, often using the same dies as were used for the silver coins. A few copper coins were struck during the reign of Brajanatha Simha (1818-19), but these are very rare.

NUMERALS

The early coinage is usually dated in the Saka era using Bengali numerals while later issues use modified numerals called Assamese.

BIDAR

Barid Shahs

For all practical purposes the Barid Shahi sultans established their kingdom at Bidar about 1492 when Qasim Barid, minister of Mahmud Bahmani, asserted his independence. Beyond a few majestic buildings at Bidar, the capital, and an impressive fortress, the dynasty left little impression on the

Deccan. About 1619 the kingdom was absorbed by Bijapur.

FALUS

The Barid Shahs of Bidar based on the traditional *gani* weighing around 15 grams, maintained a copper coinage on a weight standard different from that of the neighboring Adil Shahs of Bijapur who eventually absorbed their principality. Their coins are generally scarce or rare, and are without mintname although struck at Bidar.

BIJAPUR

Adil Shahs

The Adil Shahi dynasty of Bijapur was named after its founder, Yusuf Adil Khan, the Bahmani governor of the region. In 1489, reacting to Bahmani weakness and to the outrageous leadership of Mahmud Shah, Yusuf Adil Khan asserted his independence. If the records can be trusted, Yusuf was a scion of the Turkish royal house who had fled to India only to be sold as a slave in Bidar to a minister of the Bahmani ruler. Remarkably, he worked his way up from so unpromising a situation to the position of a regional governor, and then sultan, over what was destined to become the most prominent of the five Muslim sultanates of the Deccan. Bijapur became famed as a center of Sufism, a form of Muslim mysticism and sensitivity, and was renowned for the elegance of its city and its architecture. Even its coinage had a distinctive quality. In the copper series some of the calligraphy is conspicuously superior to that of Bijapur's neighbors and its silver larins are almost unique. The dynasty flourished for almost two centuries until, in 1686, the city of Bijapur and its surrounding areas were annexed by the Mughal emperor Aurangzeb.

FALUS

Many Islamic copper coins were known as "falus" irrespective of weight. The Adil Shahi copper coinage appears to have been based on a unit of around 12 grams - the normal tola weight - with fractional units.

COOCH BEHAR

During the 15th century, the area that was to become Cooch Behar was ruled by the powerful Hindu kings of Kamata, who were defeated by Sultan Ala al din Husain, Shah of Bengal in 1494AD. In 1511AD the kingdom of Cooch Behar was established by Chandan, a chieftain of the Koch tribe.

Chandan was succeeded about 1522 by Visvasimha, who consolidated the kingdom, and set up his capital at the present town of Cooch Behar. It was he who laid the foundations of the prosperity of the area by developing the Tibetan trade routes through Bhutan. Visvasimha is said to have abdicated about 1555AD to become an ascetic, and was succeeded by his son Nara Narayan, under whose reign the state reached the zenith of its power.

From the solid basis set up by his father, Nara Narayan set out, assisted by his brother Sukladhvaja, to extend the borders of his kingdom. Over the next quarter century he proceeded to subdue part of the Assam Valley, Kachar, Manipur, the Khasi and Jaintia Hills and part of Tripura and Sylhet. Nara Narayan was the first king of Cooch Behar to strike coins, and the varied style may indicate that he set up several mints over his empire. The style of one piece is very similar to that of later pieces struck by the Rajas of Jaintiapur, which suggests Jaintiapur as the mint for this variety, but no other varieties have been assigned to specific mints.

After the death of Sukladhvaja, who was a great general, the military strength of the kingdom waned. Nara Narayan quarrelled with Sukladhvaja's son Raghu Deva, and the latter set himself up as ruler of the eastern part of the kingdom in 1581, initially under the suzerainty of his uncle, but after Nara Narayan's death, as full independent ruler.

Nara Narayan's son, Lakshmi Narayan inherited the western part of the kingdom, but no attempt was made to consolidate the conquests made by his father, and Kachar, Tripura and other states reverted to their former fully independent state. Lakshmi Narayan was a weak, peace loving king who preferred to declare himself a vassal of the Mughal Emperor in 1596, rather than make any attempt to preserve his independence. In accepting any attempt to preserve his independence. In accepting Mughal suzerainty, he gravely offended his subjects, who rose in revolt. The Mughals assisted Lakshmi Narayan quell the rebellion, and in 1603 a treaty was signed under which Lakshmi Narayan agreed never again to strike full rupees and to abandon certain other royal prerogatives. The Eastern Kingdom under Raghu Deva and his son Parikshit refused to bow to Mughal domination in the same way, and in 1612 the Mughals invaded and destroyed their kingdom.

After Lakshmi Narayan's death in 1627, the new ruler Vira Narayan exhibited a certain degree of independence by striking full rupees and retaking the former Eastern Cooch Behar Kingdom from the Mughals. By this time, however, a powerful leader had emerged in Bhutan, and trade was disrupted by wars between Bhutan and Tibet, causing a reduction in the number of coins struck.

The Mughals soon recaptured the eastern territories, but the next ruler, Prana Narayan, was able to reopen trade links with Tibet through Bhutan. In 1661 Prana Narayan was expelled from his capital by the Mughal governor of Bengal, Mir Jumia, and sought refuge in Bhutan. At this time, Mir Jumia struck coins in Cooch Behar in the name of the Mughal Emperor Aurangzeb, but while Mir Jumia was stuck in Assam during the monsoon of 1663, Prana Narayan managed to regain control of his kingdom paying tribute to the Mughal Emperor.

For the next century Cooch Behar was relatively peaceful until there was a dispute over the succession in 1772. After a confusing period during which the Bhutanese installed their own nominated ruler and captured Dhairyendra Narandra, the Chief Minister appealed to the British for assistance. With an eye on the potentially lucrative Tibetan trade, which had increased somewhat in volume since Prithvi Narayan's rise to power in Nepal, the British agreed to support Darendra Narayan, so long as British suzerainty was acknowledged.

DATING
The coins are dated in either the Saka era (Saka yr. + 78 = AD year) or the Cooch Behar era (CB yr. + 1510 = AD year) calculated from the year of the founding of the kingdom by Chandan in 1511AD. Some coins have dates in both eras, but as the Saka always refers back to the accession year, and the Cooch Behar year seems to show the actual date of striking, the two years seems to show the actual date of striking, the two years do not necessarily correspond to the same AD year.

Unfortunately the dies for the half rupees were usually rather broader than the flans, so the year is only rarely visible.

GOLKONDA

Qutb Shahs

The Qutb Shahi kingdom of Golkonda was the last of the five Deccani sultanates to break free of the Bahmanis and the last to fall to the Mughal army. The dynasty was founded in 1518 by an officer who came to be known as Quli Qutb Shah, whose long and prosperous reign laid a solid foundation for his successors. Early in his reign he moved his capital to Golkonda from Warangal, once capital of the old Hindu Kakatiya kingdom which had fallen to the Tughluqs of Delhi. Here at Golkonda the Qutb Shahs built a powerful fortress seven miles in circumference, and from here they governed the area until increasing Mughal pressures led to its annexation by Aurangzeb in 1687. Within fifty years, in the twilight of Mughal fortunes, regionalism again asserted itself and Golkonda became the citadel of Nizam-ul Mulk, the founder of Hyderabad State.

NOTE: The only known coins of the Qutb Shahs are copper.While weight systems vary between rulers, and even within a single reign, the coins in any one system clearly comprise a basic unit and its fractions - two thirds, one-half and one-third - by weight. Further details may be found in QUTUB SHAHI COINS IN THE ANDHRA PRADESH GOVERNMENT MUSEUM, by Muhammad Abdul Wali Khan, Hyderabad, India, 1961.

COPPER COINAGE

Around 1604AD copper coins began to be struck in the name of Muhammad Quli on a heavier weight standard (17-18 grams) from a new mint, Hyderabad. All are on round planchets and most carry the apparently frozen date AH1012.

Sultan Muhammad continued his predecessor's copper coinage type from Hyderabad, with the apparently frozen date AH1025 (1585AD). Fractions are extremely rare.

The decline of the Qutb Shahi kingdom can be seen in the changes in Abdullah's copper coinage which began with coins bearing his name and titles on a relatively heavy weight standard, declining into lighter, cruder coins and ending in anonymous issues bearing a pathetic, fatalistic verse.

GOND

Deogarh is located about 40km south of Chhindwara (presently in Madhya Pradesh, India) at Jataba. A very powerful king was the founder of the Deogarh branch of the Gond dynasty, in AD1570 Jataba I took over the Deogarh from the Gawali kings Ranshur and Dhansur. It has a strong fort. The graves of Jataba and Kokashah are to be found at the Royal Cemetery. The Mughal kings were the supreme power at that time and Deogarh was under Akbar, Jahangir, Shahjahan, and Aurangzeb. Jataba ruled Deogarh for 50 years. Kokashah was also known as Mahipatrao. Kokashah (Mahipatrao) was succeeded by his son Jataba II in 1640AD. He is also known as Kesari Singh. He ruled for about seventeen years and died in AD1657. The son of Jataba II, Kokashah II, alias Garakhdas ruled Deogarh from AD1657. He died in AD1687.

His son Bakhtshah who was renamed Bakht Buland, upon accepting the Islam religion to please Aurangzeb, the Mughal king. He also changed the name of Deogarh to Islamgarh. Chand Sultan succeeded Bakht Buland. Both were incapable of ruling Deogarh on their own.

The descendents of Chand Sultan: Wali Shah, Burhan Sha and Akbar Shah, were quarrelsome, so that the king of Nagpur, Raghuji Bhonsle, empowered by Chhatrapati Sahy killed Wali Shah and annexed the sovereignty of Gond to his kingdom. This was the end of Gond Kingdom.

JAINTIAPUR

The territory ruled over by the Jaintia Rajas consisted of the Jaintia Hills, and a section of the adjoining plains to the north of Sylhet.

In the Cooch Behar chronicle it is recorded that when Nara Narayan defeated the Jaintia Raja about 1564AD, one of the conditions imposed on the defeated monarch was that he should never put his own name on his coins, but only that of his capital city. Whether this is the true reason is open to debate, but virtually all the coins of Jaintiapur are anonymous, and merely bear the accession year of the ruler during whose reign they were issued.

The earliest known coins of Jaintiapur are dated 1633AD, and are clearly copied in general design and weight standard from the coins of Cooch Behar. During the 18th century the right to strike coins was sold by the Raja to the highest bidder, and this resulted in a serious debasement of the coinage, which therefore never circulated outside the confines of the State.

Independence was retained until 1835AD, when the administration was finally taken over by the British.

RULERS

Local traditions have preserved the names of the Jaintia Kings since the kingdom was founded, but few reliable dated are known for the early Kings.

KACHAR

The Kacharis are probably the original inhabitants of the Assam Valley, and in the 13th century ruled much of the south bank of the Brahmaputra from their capital at Dimapur.

Around 1530 the Ahoms inflicted several crushing defeats on the Kacharis, Dimapur was sacked, and the Kacharis were forced to retreat further south and set up a new capital at Maibong.

Very little is known about this obscure state, and the only time that coins were struck in any quantity was during the late 16th and early 17th centuries. One coin, indeed, proudly announces the conquest of Sylhet, but the military prowess seems to have been short lived, and the small kingdom was only saved from Muslim domination by its isolation and lack of economic worth.

A few coins were struck during the 18th and 19th centuries, but this was probably merely as a demonstration of independence, rather than for any economic reason.

In 1819, the last Kachari ruler, Govind Chandra was ousted by the Manipuri ruler Chaurajit Simha, and during the Burmese occupation of Manipur and Assam, the Manipuris remained in control of Kachar. In 1824, Govind Chandra was restored to his throne by the British, and ruled under British suzerainty. By all accounts his administration was not a success, and in 1832, soon after Govind Chandra had been murdered, the British took over the administration of the State in "compliance with the frequent and earnestly expressed wishes of the people.

The earliest coins of Kachar were clearly copied from the contemporary coins of Cooch Behar, with weight standard also copied from the Bengali standard. The flans are, however, even broader than those of the Cooch Behar coins, making the coins very distinctive.

A number of spectacular gold and silver coins, purporting to come from Kachar, appeared in Calcutta during the 1960's, but as their authenticity has been doubted, they have been omitted from this listing.

A list of the Kings of Kachar has been preserved in local traditions, but is rather unreliable. The following list has been compiled from this traditional list, together with names and dates obtained from other sources, but may not be completely accurate.

MADURAI

Nayakas

Located in South India approximately 180 miles north of the southernmost tip. It is noted for its great temple with colonnades and nine massive gate towers (gopuras) adorned with elaborate carvings and enclosing a quadrangle, the "Tank of the Golden Lilies". It was the capital of the Pandya dynasty from 5th century B.C. to the end of the 11th century A.D. It came under Vijayanagar control in the 14th century A.D.; and then under the Nayak dynasty from about the middle of the 16th century to 1735AD when it was taken by the Nawab of the Carnatic. Later, in 1801, it came under the rule of the British East India Company.

PUDUKKOTTAI

Pudukota

Raghunatha Raya Tondaiman founded Pudukkottai in 1686 when he defeated the Pallavaraya chiefs of the area. The family came from Tondaimandalam, a small village near Tirupathi, and belonged to the Kallen (or robber) caste. In the late 18th century the Tondaimans aided the British in their struggles against the French in the Carnatic. With British ascendancy, the Pudukkottai rulers were confirmed in their control of the region. This was regularized in 1806 when, subject to a yearly tribute of one elephant, the rajas of Pudukkottai were guaranteed their position. In 1948 the State was merged into the Trichinopoly District.

TRIPURA

Hill Tipperah

Tripura was a Hindu Kingdom consisting of a strip of the fertile plains east of Bengal, and a large tract of hill territory beyond, which had a reputation for providing wild elephants.

At times when Bengal was weak, Tripura rose to prominence and extended its rule into the plains, but when Bengal was strong the kingdom consisted purely of the hill area, which was virtually impregnable and not of enough economic worth to encourage the Muslims to conquer it. In this way Tripura was able to maintain its full independence until the 19th century.

The origins of the Kingdom are veiled in legend, but the first coins were struck during the reign of Ratna Manikya (1464-89) and copied the weight and fabric of the contemporary issues of the Sultans of Bengal. He also copied the lion design that had appeared on certain rare tangkas of Nasir-ud-din Mahmud Shah I dated AH849 (1445AD). In other respects the designs were purely Hindu, and the lion was retained on most of the later issues as a national emblem.

Tripura rose to a political zenith during the 16th century, while Muslim rule in Bengal was weak, and several coins were struck to commemorate successful military campaigns from Chittagong in the south to Sylhetin the north. These conquests were not sustained, and in the early 17th century the Mughal army was able to inflict severe defeats on Tripura, which was forced to pay tribute.

In about 1733AD all the territory in the plains was annexed by the Mughals, and the Raja merely managed his estate there as a zemindar, although he still retained control as independent King of his hill territory.

The situation remained unchanged when the British took over the administration of Bengal in 1765, and it was only in 1871 that the British appointed an agent in the hills, and began to assist the Maharaja in the administration of his hill territory, which became known as the State of Hill Tipperah.

After the middle of the 18th century, coins were not struck for monetary reasons, but merely for ceremonial use at coronations and other ceremonies, and to keep up the treasured right of coinage.

The coins of Tripura are unusual in that the majority have the name of the King together with that of his Queen, and is the only coinage in the world where this was done consistently.

In common with most other Hindu coinages of northeast India, the coins bear fixed dates. Usually the date used was that of the coronation ceremony, but during the 16th century, coins which were struck with a design commemorating a particular event, bore the date of that event, which can be useful as a historical source, where other written evidence is virtually non-existent.

All modern Tripura coins were presentation pieces, more medallic than monetary in nature. They were struck in very limited numbers and although not intended for local circulation as money, they are often encountered in worn condition.

VIJAYANAGAR

The Vijayanagar kingdom was founded by two brothers, Harihari and Bukka, from the Telangana region of present day Andhra Pradesh in East Central India. They had previously served the raja of Warangal until they were captured and transported to Delhi where they were reputed to have become converts to Islam. They then revolted and, returning to the Hindu fold, in 1336 founded the kingdom as a bulwark against further Muslim inroads into the South. Vijayanagar (literally, City of Victory) grew into the most remarkable of all the medieval Hindu kingdoms. Some 19 square miles in area, Vijayanage itself - the capital after which the empire was named – sat on the southern bank of the Kristna river, not far from modern Hospet in Mysore State. Contemporary observers compared the city both in size and stature to ancient Rome.

Even to this day, the ruins of this remarkable capital are among the most impressive anywhere in India. Resplendent with intricate stone carving, fine temples and broad public ways, it was a city whose wealth knew no equal in South or Central India. Its sovereignty extended over virtually the whole of South India. The rulers, or rayas, of Vijayanagar were patrons of the arts and under their authority art, architecture and literature flourished. Its Hinduism was eclectic, Vaishnavite in sentiment and vibrant in expression. It was a wealthy city, whose vices were the vices of the rich. Its coinage was predominantly in gold and, like its culture, distinctly South Indian in style.

After the period of the 2 chiefs Harihari (1336-1354) and Bukka (1354-1377), Vijayanagar history fell into 4 periods, viz., the Sangama dynasty (1377-1485), the Saluva dynasty (1486-ca.1503), the Tuluva dynasty(ca. 1503-1570), and the Aravidu (or Karnata) dynasty (1570-ca. 1646). For over 2 centuries the Vijayanagar kingdom was more or less in a constant state of war against the Bahmanis and their successor sultanates in the Deccan. And for those two hundred years Vijayanagar effectively halted Muslim attempts to encroach southwards. This was the empire's golden age as Vijayanagar grew to be the one real center in India for Hindu self-expression within a context of political self-determination. Vassal to none, Vijayanagar held the south of India as a constant rebuke to Muslim expansionism.

Then, in 1565, disaster struck. The sultanates of Ahmadnagar, Bijapur, Bidar and Golkonda combined forces to bring about the destruction of Vijayanagar. Vijayanagar was well equipped for this confrontation, putting perhaps as many as a million men on the field. But, by one of those quirks in the fortunes of war, the Vijayanagar commander, Ramaraja (who was also the regent and controlling noble of the kingdom), was cut off from his troops, dragged down from his elephant, and at once beheaded. His army immediately panicked and their strategy fell apart. This battle, remembered as the battle of Talikota, was followed by a complete rout of the forces of Vijayanagar and by the plunder and destruction of their capital city.

The nominal king, in whose place Ramaraja had ruled, fled to Penukonda. There on this rocky hill further south he re-established the dynasty. Five years later he was overthrown by Tirumala, his brother, and the Karnata dynasty was inaugurated. A few years later the capital was shifted to Chandragiri, under Venkata I. Here, for a while, the truncated kingdom seemed to regain some of its lost vigor. But after Venkata's death even this dynasty disintegrated and the remnants of this once-proud empire were reduced to the status of local chiefs. Yet, in spite of Muslim encroachment into the Deccan, first by the Adil Shahis of Bijapur and the Qutb Shahis of Golkonda, and by the Mughal armies under Aurangzeb, these chieftains continued to exercise a considerable degree of local independence.

But Vijayanagar was gone, and in its passing the brightest star of Hindu art, architecture, philosophy and culture was extinguished. Never again would there rise a Hindu kingdom comparable to Vijayanagar, and never again until Indian Independence, would South India be so free of foreign domination.

INDIA-PRINCELY STATES

GARHWAL

Garhwal was a rugged tract embracing a number of peaks over twenty-three thousand feet in north India. The state dated from the 14th century when a number of local chieftains came under the sway of Ajai Pal. From that time onward his descendants ruled over this Himalayan kingdom until 1803, when the Gurkhas invaded both Garhwal and Kumaon. Shortly afterwards, in the Nepal War of 1814-1816, these States fell under British control and the State was then partially restored to its original ruler.

The Gurkhas captured Almora, the principal town of Kumaon, in 1790 and went on to seize Garhwal and Sirmur in 1803. From then until their definitive defeat at the hands of the East India Company, the Gurkhas issued coins from the Srinagar (Garhwal), Almora (Kumaon) and Nahan (Sirmur) mints.

JAISALMIR

Although the ruling Rajputs (or rawals) of this desert territory, located in northwest India traced their ancestry back to pre-Asokan times, the State of Jaisalmir was founded by Deoraj, the first rawal, only in the 10th century. Jaisalmir city was established by Rawal Jaisal, after whom both the city and the State were named. Like Jaipur, Jaisalmir reached its zenith in Mughal times, after being forced to acknowledge the supremacy of Delhi in the time of the Emperor Shah Jahan. With Mughal disintegration, Jaisalmir also fell upon hard times and most of its outlying provinces were lost. The state came under British protection in 1818, and on March 30th, 1949 it was merged into Rajasthan.

KUTCH

State located in northwest India, consisting of a peninsula north of the Gulf of Kutch.

The rulers of Kutch were Jareja Rajputs who, coming from Tatta in Sind, conquered Kutch in the 14th or 15th centuries. The capital city of Bhuj is thought to date from the mid-16th century. In 1617, after Akbar's conquest of Gujerat and the fall of the Gujerat sultans, the Kutch ruler, Rao Bharmal I (1586-1632) visited Jahangir and established a relationship which was sufficiently warm as to leave Kutch virtually independent throughout the Mughal period. Early in the 19th century internal disorder and the existence of rival claimants to the throne resulted in British intrusion into the state's affairs. Rao Bharmalji II was deposed in favor of Rao Desalji II who proved much more amenable to the Government of India's wishes. He and his successors continued to rule in a manner considered by the British to be most enlightened and, as a result, Maharao Khengarji III was created a Knight Grand Commander of the Indian Empire. In view of its geographical isolation Kutch came under the direct control of the Central Government at India's independence.

First coinage was struck in 1617AD.

INDIA - BRITISH

The civilization of India, which began about 2500 B.C., flourished under a succession of empires - notably those of the Mauryas, the Kushans, the Guptas, the Delhi Sultans and the Mughals – until undermined in the 18th and 19th centuries by European colonial powers.

The Portuguese were the first to arrive, off Calicut in May 1498. It wasn't until 1612, after the Portuguese and Spanish power had begun to wane, that the British East India Company established its initial settlement at Surat. Britain could not have chosen a more propitious time as the central girdle of petty states, and the southern Vijayanagar Empire were crumbling and ripe for foreign exploitation. By the end of the century, English traders were firmly established in Bombay, Madras, Calcutta and lesser places elsewhere, and Britain was implementing its announced policy to create such civil and military institutions as may be the foundation of secure English domination for all time. By 1757, following the successful conclusion of a war of colonial rivalry with France during which the military victories of Robert Clive, a young officer with the British East India Company, made him a powerful man in India, the British were firmly settled in India not only as traders but as conquerors. During the next 60 years, the British East India Company acquired dominion over most of India by bribery and force, and governed it directly or through puppet princelings.

BOMBAY PRESIDENCY

Following a naval victory over the Portuguese on December 24, 1612 negotiations were started that developed into the opening of the first East India Company factory in Surat in 1613. Silver coins for the New World as well as various other foreign coins were used in early trade. Within the decade the Mughal mint at Surat was melting all of these foreign coins and re-minting them as various denominations of Mughal coinage.

Bombay became an English holding as part of the dowry of Catherine of Braganza, Princess of Portugal when she was betrothed to Charles II of England. Also included in the dowry was Tangier and $500,000. With this acquisition the trading center of the Indian West Coast moved from Surat to Bombay.

Possession of Bombay Island took place on February 8, 1665 and by 1672 the East India Company had a mint in Bombay to serve their trading interests. European designed coins were struck here until 1717. Experimental issues of Mughal style rupees with regnal years pertaining to the reigns of James II and William and Mary were made in 1693-94.

MADRAS PRESIDENCY

English trade was begun on the east coast of India in 1611. The first factory was at Mazulipatam and was maintained intermittently until modern times.

Madras was founded in 1639 and Fort St. George was made the chief factory on the east coast in 1641. A mint was established at Fort St. George where coins of the style of Vijayanagar were struck.

The Madras mint began minting copper coins after the renovation. In 1689 silver fanams were authorized to be struck by the new Board of Directors.

In 1692 the Mughal Emperor Aurangzeb gave permission for Mughal type rupees to be struck at Madras. These circulated locally and were also sent to Bengal. The chief competition for the Madras coins were the Arcot rupees. Some of the bulk coins from Madras were sent to the Nawabs mint to be made into Arcot rupees.

INDIA-DANISH TRANQUEBAR

Danish India or Tranquebar is a town and former Danish colony on the southeast coast of India. In Danish times, 1620-1845, it was a factory site and seaport operated by the Danish Asiatic Company. Tranquebar and the other Danish settlements in India were sold to the British East India Company in 1845.

INDIA-DUTCH

The Netherlands, operating as the United East India Company of the Netherlands, were the real successors to the Portuguese in India. They maintained a number of thriving establishments on the subcontinent until 1795, when Robert Clive, founder of the empire of British India, completed Britain's conquest of Bengal. Thereafter the Dutch holdings were gradually ceded to Britain, the most important to numismatics being Cochin, ceded in 1814; Negapatnam, ceded in 1784; Pulicat, ceded in 1824; and Tuticorin, ceded in 1795.

MINTS

Cochin

Cochin, which is located on the west coast in South India, was acquired from Portugal in 1663. Even though the British occupied it in 1795 it wasn't ceded to them until 1814. Later issues are referenced with Indian Princely States - Cochin.

Jagganthapur

Masulipatnam

A Dutch trading station since 1605AD. The gold coins were struck on the old South Indian standards, mainly to pay the rent to the local ruler. Taken over by the French in 1751AD.

Negapatnam

Taken from the Portuguese in 1658AD. Mint right established in 1662. VOC - head-office of the Coromandel (Southeast Indian coast) from 1690AD to the British takeover in 1784AD.

Pulicat

VOC head office of the Coromandel (South East Indian coast) from its establishment in 1610-1690 and after 1784. Fortress Gelria was the first company mint in India. It was a British possession from 1781-1784, 1795-1818 and finally ceded to Great Britain in 1824.

INDIA-FRENCH

It was not until 1664, during the reign of Louis XIV, that the Compagnie des Indes Orientales was formed for the purpose o obtaining holdings on the subcontinent of India. Between 166 and 1721, French settlements were established at Arcot, Mahe Surat, Pondichery, Masulipatam, Karikal, Yanam, Murshidabad Chandernagore, Balasore and Calicut. War with Britain reduce the French holdings to Chandernagore, Pondichery, Karikal Yanam and Mahe. Chandernagore voted in 1949 to join India an became part of the Republic of India in 1950. Pondichery, Karikal Yanam and Mahe formed the Pondichery union territory an joined the republic of India in 1954.

INDIA-PORTUGUESE

Vasco da Gama, the Portuguese explorer, first visited India in 1498. Portugal seized control of a number of islands and small enclaves on the west coast of India, and for the next hundred years enjoyed a monopoly on trade. With the arrival of powerful Dutch and English fleets in the first half of the 17th century, Portuguese power in the area declined until virtually all of India that remained under Portuguese control were the west coast enclaves of Goa, Damao and Diu. They were forcibly annexed by India in 1962.

RULER
Portuguese, until 1961

DENOMINATION
The denomination of most copper coins appears in numerals on the reverse, though 30 Reis is often given as "1/2 T", and 60 Reis as "T" (T = Tanga). The silver coins have the denomination in words, usually on the obverse until 1850, then on the reverse.

BACAIM

(Bessein)

Located less than 30 miles north of Bombay on the Gulf of Cambay. In 1611 the Portuguese opened a mint at Bacaim. The greatest minting activity was between 1678 and 1697. Many issues for Bacaim were in conjunction with other Portuguese settlements. The British took Bacaim in 1780.

COCHIN

(Cochim)

Cochim was the first European settlement in India. Vasco da Gama founded a trading factory for the Portuguese at this location in 1502. Alfonso d'Albuquerque (who was to be the second governor of Portuguese settlements in India, 1509-1515) built a fort here in 1503. This location was an important Portuguese center until the British withdrew when the Dutch attacked in 1663. The town was retaken by the British in 1795.

DIU

A district in Western India formerly belonging to Portugal. It is 170 miles northwest of Bombay on the Kathiawar peninsula. The Portuguese settled here and built a fort in 1535. A mint was opened in 1685 and was closed in 1859. As with Damao, the importance of Diu diminished with the passage of time. It was annexed to India in 1962.

Iran (historically known as Persia until 1931AD) is one of the world's most ancient and resilient nations. Strategically astride the lower land gate to Asia, it has been conqueror and conquered, sovereign nation and vassal state, ever emerging from its periods of glory or travail with its culture and political individuality intact. Iran (Persia) was a powerful empire under Cyrus the Great (600-529 B.C.), its borders extending from the Indus to the Nile. It has also been conquered by the predatory empires of antique and recent times - Assyrian, Medean, Macedonian, Seljuq, Turk, Mongol - and more recently been coveted by Russia, the Third Reich and Great Britain. Revolts against the absolute power of the Persian shahs resulted in the establishment of a constitutional monarchy in1906.

MONETARY SYSTEM

The Shahi was a fixed unit, first coined in AD1501, equal to 50 Dinars. The Toman, introduced as a unit of account about AH1240 (1824AD) was always fixed at 10,000 Dinars. The value of the Rupee for this period is not known with certainty.

SILVER and GOLD COINAGE

The precious metal monetary system of Qajar Persia prior to the reforms of 1878 was the direct descendant of the Mongol system introduced by Ghazan Mahmud in 1297AD, and was the last example of a medieval Islamic coinage. It is not a modern system, and cannot be understood as such. It is not possible to list types, dates, and mints as for other countries, both because of the nature of the coinage, and because very little research has been done on the series. The following comments should help elucidate its nature.

DENOMINATIONS

In addition to the primary denominations, noted in the last paragraph, fractional pieces were coined, valued at one-eighth, one-fourth, and one-half the primary denomination, usually in much smaller quantities. These were ordinarily struck from the same dies as the larger pieces, sometimes on broad, thin flans, sometimes on thick, dumpy flans. On the smaller coins, the denomination can best be determined only by weighing the coin. The denomination is almost never expressed on the coin!

NOTE: This is a sampling of what dates and types exist. For pricing other examples use same mint and judge by strike and grade.

NOTE: Grade and clarity of strike are both important in pricing Iranian coins. Prices listed here are for average strikes. Fully struck and well centered can can command a premium up to two times what is appropriate. For examples of an excellent strike see KM 209; common strike see KM 241; poor strike see KM 195.
